GUEPARDO IS THE TAX SOLUTION OF GRUPO BOTICÁRIO

With over 3900 points of sale in Brazil and abroad, Grupo Boticário is the world's largest network of perfumery and cosmetics franchises. 11 years ago it partnered with FH for SAP consulting projects.

Grupo Boticário has been offering complete beauty solutions and delighting consumers for 37 years. The O Boticário business unit has more than 3,900 stores in Brazil and abroad, making Grupo Boticário the largest network of perfumery and cosmetics franchises in the world. In 2004, FH became a partner for SAP implementation and over the years this partnership has been consolidated. In 2012, the Group sought a unique solution in the market that would help in management and

also in fiscal and tax planning: the choice for GUEPARDO was natural. Henrique Adamczyk, IT Director of Grupo Boticário, says that he soon realized that the partnership would be very positive. "The FH is a different company, the level of commitment, the skills of its professionals and the availability and assertiveness that it offers".

CHALLENGES

The tax solution should include direct and indirect taxes and be integrated and certified by SAP with deliveries that accompany the growth of the Boticário Group, both in the volume of operations and in the segmentation of new businesses and nationwide.

SUCCESS CASE

The implementation of GUEPARDO generated immediate results. “Before, just to do the LALUR - Livro de apuração do Lucro Real - we took six hours to extract numbers from SAP and put in an Excel spreadsheet. Today the calculation brings the numbers automatically and we have these six hours to analyze from a managerial point of view ”, reports Renato Soares, Direct Taxes Supervisor of Grupo Boticário.

OPERATIONAL BENEFITS

- # Data automatically brought to calculations;
- # Risk elimination of manual inputs;
- # Fewer people dedicated to Pis / Confis verification;
- # Agility in processes;
- # Increased time for data analysis and tax planning;
- # Cost reduction;
- # More homogeneous landscape;
- # Monitoring via Solution Manager;
- # Native integration with the SAP platform.
