OUROFINO IMPLEMENTS SAP ECC, GUEPARDO AND SAP SUPPORT WITH FH

Ourofino Agronegócio is one of the largest companies in the Brazilian market of veterinary products and is considered one of the most modern factories in this segment in Latin America. It is respected in the market for the quality of its products, for its innovative attributes and the way it treats its employees.

With its recent entry in the pesticide market and opening of a new factory, Ourofino, which invests in innovation and cutting-edge technologies, felt the need to seek solutions and suport that would meet its strategic demands. SAP's strategy to become one of the largest database providers in the world, and the compatibility speed of ECC versions, HANA and ASE database were decisive in choosing the Sybase ASE database. Then, choosing a robust tax solution integrated with the Netweaver platform led Ourofino to implement GUEPARDO, a solution developed by FH. The company also needed an SAP specialist team to ensure a high-performance operation from the first month, so they contracted AMS suite, FH's support service.

OVERVIEW

Industry	Agrobusiness
Income	Not reported
Employees	1400 collaborators
Location	Brasil
Site	ourofino.com

CHALLENGES

The project's big challenge would be completing implementation in just over 10 months, while Ourofino was preparing the system for international validation (FDA), which demanded additional attention. The company completely replaced the previous ERP, which required extremely professional project management, efficient and aware to possible deviations.

SUCCESS CASE

As an SAP partner, FH implemented SAP ECC at Ourofino Agronegócio, enabling full management of the company. This was the first SAP ERP implementation case in Sybase ASE that is already in production in Brazil. Soon after, GUEPARDO tax solution was implemented and, finally, adopting AMS suite, SAP Application Support, completed the investment made by the company with FH.

OPERATIONAL BENEFITS

Commission process performed 100% in the ERP with Vistex solution;

Employees' time card management and control were transferred to managers and directors;

Position and wage management performed in SAP and no longer in spreadsheets;

DMS Implementation for registering and controlling all documentation from Quality Control and Assurance area;

DMR Implementation for integrated management of material master records;

Mobility solution developed in the SUP platform for approval of purchase requisitions via Iphone;

Integration and traceability of commercial processes with other areas, from production planning to accounting;

Generation of all tax obligations in a single tool, fully integrated with SAP.
